 imthedarkestspawn@gmail.com

 Málaga, Spain

I am passionate about creating video games, technological development and learning **new skills**.

As a **self-taught** developer, I adapt quickly to new technologies.

I value both developing **well-structured** code architectures and making design decisions with a **clear purpose**.

"There is no greater satisfaction than seeing a game begin to exist on its own, supported by a solid technical foundation and a design thought out down to the smallest detail."

STUDIES

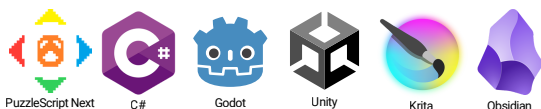

- **Master's Degree in Video Game Creation (XII Edition)**
University of Málaga (2025 - Present)
- **Bachelor's Degree in Software Engineering**
University of Málaga (2021 - 2025) Average Grade: 8.17
- **Technological Baccalaureate**
IES Juan de la Cierva (2019 - 2021)

WORK EXPERIENCE

- **Indra Produccion Software S.L. (Minsait)**
Software Developer (University Internship)
March 24, 2025 – July 31, 2025
Teamwork under an Agile methodology (Scrum), SourceTree, Jira
React, JavaScript, HTML, CSS, VS Code
Spring Boot, Java, IntelliJ IDEA, SQL, DBeaver

Development of new features and bug fixing on the frontend, as well as analysis of backend features to adjust their behavior and implementation of unit tests using JUnit to improve code coverage.

SKILLS

- **Spanish – Native**
- **English – B1** (Cambridge Certified)
- **Driving Licence B** 

PROJECTS

• **Set Wars: Cardinal Bounds**

Developed in **Godot** with **C#**

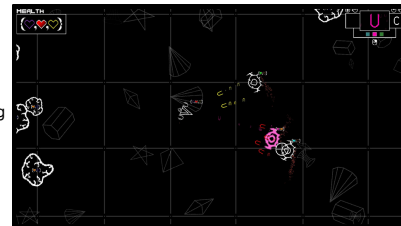

Grade: 10/10 + Honors

Bachelor's Degree Final Project in Software Engineering

2D top-down space shooter with a retro arcade style, where **mathematical set theory** is used for combat and the life system.

Game available on my itch.io

The project report is [available on RiUMA](#)

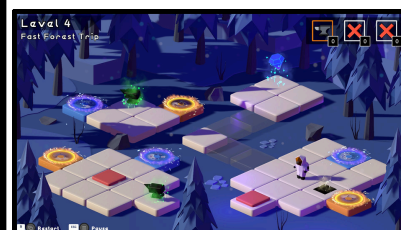

• **Mortis Space Mission**

Developed in **Unity** with a friend.

3D puzzle game where the player controls an astronaut who uses tools to progress and collect diamonds. Using these tools causes the character to die, although they subsequently revive, which dictates level resolution.

Currently features **2 worlds** with a total of **40 levels**.

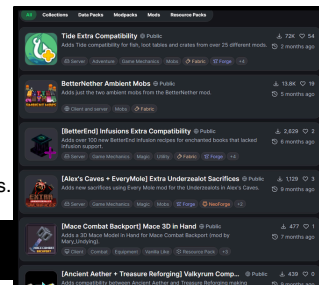

• **Minecraft Mods & Datapacks**

Development of mods and datapacks for Minecraft published on Modrinth and CurseForge, with a combined total of over **100k** downloads.

I also participate in open-source projects, making pull requests and reporting issues in community repositories.

 [Modrinth](https://modrinth.com)

 [CurseForge](https://curseforge.com)

• **My Life As A...**

Developed in **Unity** with a team

2D video game that simulates the experience of being a Software Engineering student at the University of Málaga.

• **PokéRoll**

Developed using **React**

Team of 4 members: [Magnet Studio](#)

Web-based Pokémon video game using the PokéAPI
No backend, using local storage for data persistence and **accessibility** improvements for visually impaired users.
